

600 Graphic Link Words for Female and Male First Names and Faces

by

Ron White and Lew Toulmin

These are names and images to be used to remember names and faces. Focus on the person whose first name you are trying to remember, select a feature (“the file”) on his/her face that is distinctive, then place the image below onto the file, “seeing” it clearly in your mind’s eye. These images are drawn from my (Lew Toulmin’s) background and interest in history, aviation and foreign travel; you may wish to develop images of your own that link to the name of the person. Many of these images come from or were modified from Ron White’s excellent “Black Belt Memory” course, which is recommended. The most popular names are marked on the right with a number sign (#) and the relevant ranking.

WOMEN’S NAMES LINK WORDS (~272)

- Abby – A bee
- Abigail – A bee in a gale
